

MUNEEB UR REHMAN

Software Engineer | Full-Stack · Cloud-Native · AI/RAG

Novi, Michigan, USA · (734) 201-3706 · muneeb9610@gmail.com · [LinkedIn](#)

PROFESSIONAL SUMMARY

Software Engineer with 5+ years designing and scaling full-stack web, mobile, and desktop applications across fintech, entertainment, and e-commerce. Strong in React, Node.js, C#, and Python, with hands-on cloud-native experience in Kubernetes and AWS. Ships customer-facing features, strengthens deployment reliability through CI/CD automation, and delivers in fast-paced Agile teams. Holds a Diploma in Artificial Intelligence with working knowledge of Retrieval-Augmented Generation (RAG) — including vector embeddings, semantic search, and LLM integration pipelines.

TECHNICAL SKILLS

Frontend: React, React Native, Angular, Redux, TypeScript, Electron

Backend: Node.js, ASP.NET, GraphQL, Python, C#, PHP/Laravel

Cloud & DevOps: AWS Lambda, Kubernetes, Helm, Flux CD, Docker, Terraform, GitHub Actions

Databases: SQL Server, MS SQL, PostgreSQL, Firebase

ML / AI: TensorFlow, Keras, NLP, Deep Learning, RAG / LLM integration

PROFESSIONAL EXPERIENCE

Software Engineer

Jan 2022 – Present

TEO-International (Remote)

- Led full-stack architecture, development, and delivery of web and desktop features, enabling customer-facing functionality for a large-scale digital platform.
- Built and shipped cinema modules for ad delivery, on-screen greetings, and interactive games, expanding product capabilities and audience engagement.
- Engineered CI/CD pipelines with GitHub Actions, Helm, and Kubernetes, increasing deployment reliability and reducing rollbacks.
- Developed and maintained frontend and backend components in React, TypeScript, Angular, and Node.js, improving UI scalability and maintainability.
- Integrated distributed services and third-party APIs, ensuring seamless data flow across applications.
- Drove sprint planning and task allocation, improving delivery predictability across teams.

Software Engineer

Nov 2019 – Jan 2022

CodeJunkie

- Delivered secure banking features — fund transfers, beneficiary management, and account statements — for AionDigital, supporting transaction integrity and compliance.
- Built a marketplace platform with merchant and consumer mobile apps, enabling product listings, search, and end-to-end order flows.
- Developed social and community apps featuring user profiles, content sharing, and event scheduling to increase user engagement.
- Maintained and optimized web and mobile applications for usability and performance across multiple client projects.

EDUCATION

Diploma in Artificial Intelligence

Sep 2019 – Feb 2021

PIAIC

Coursework: Python (OOP & Functional), Linear Algebra & Statistics, Data Science, Deep Learning (Keras & TensorFlow), Docker & Containerization, Python Microservices, Linux & Bash, Git.

BS in Information Technology

Sep 2015 – Aug 2019

Bahria University, Islamabad, Pakistan

Coursework: Data Structures & Algorithms, OOP, Mobile App Development, Web Engineering, DBMS, Cloud Computing, Artificial Intelligence, System Analysis & Design.

Final-Year Project: AI-powered medical diagnosis chatbot built on the Rasa stack.

CERTIFICATIONS

- Microsoft Technology Associate — Introduction to Programming Using Python, Microsoft (Mar 2020).
